		Note - If outgoing circuits are connected, they must be tested.	
Certification (by Person Authorised Under the Electrical Safety Act 2002 to Perform and Test the Electrical Work)			
I certify that I am authorised under the <i>Electrical Safety Act</i> 2002 (Qld) to perform electrical work and to connect the electrical installation on which I perform electrical work to a source of electricity. I also state that the electrical installation will be completed in accordance with the requirements of the <i>Electrical Safety Regulation</i> 2013 (Qld) and <i>Queensland Electricity Connection and Metering Manual</i> , that tests will be carried out in the way required under part 10 of the <i>Electricity Safety Regulation</i> 2013 (Qld) and that the electrical installation will be electrically safe and ready for connection by the date work ready for connection stated above. I confirm that I am authorised by the Customer whose details appear above to provide this information in connection with their Connection Application for the above electrical installation.

Embedded Generating Unit Installer's Confirmations

	Yes		Yes	N/A
Embedded generator (EG), including micro EG, unit has been tested, deemed electrically safe to be re-energised, and left switched off.	<input type="checkbox"/>	Inverter capacity >5kVA has been spread over multiple phases, and capacity difference per phase doesn't exceed 5kVA.	<input type="checkbox"/>	<input type="checkbox"/>
All required meter isolation links are installed and meter board hinged as per QECMM requirements.	<input type="checkbox"/>	The inverter has been set to ensure it does not export energy to the grid.	<input type="checkbox"/>	<input type="checkbox"/>
The maximum voltage trip point has been set to Ergon Energy's requirements: Tick type installed. <input type="checkbox"/> Single-stage Vmax setting: 255V (2 second trip), <input type="checkbox"/> Two-stage Vmax setting: 255V (10 minute average) & 260V (2 second trip) Note: The single-stage systems may only be installed until AS4777 Part 2 is updated in late 2015 & makes it mandatory that all systems are two-stage.	<input type="checkbox"/>	Reactive power control has been set to Ergon Energy's requirements. If Yes, reactive power control setting (all lagging) 0.8 <input type="checkbox"/> 0.85 <input type="checkbox"/> 0.9 <input type="checkbox"/> 0.95 <input type="checkbox"/> Battery has been configured to ensure it does not export energy to the grid.	<input type="checkbox"/>	<input type="checkbox"/>

Guidelines - Request for Initial Connection, Metering Change or Service Alteration

Information and guidelines regarding completing Request for Initial Connection, Metering Change or Service Alteration Form (Hard Copy aspects as indicated – all other requirements apply to both electronic and hard copy forms)

- Please use a black pen and print in legible block letters - Applies to hard copy only
- The following mandatory information must be provided:
 - Sufficient detail to identify the customer and to locate the premises and metering position on site. Note – In the address section "Locality" heading refers to the city suburb, town, or local area in rural locations. Un-metered supplies will require GPS coordinates.
 - Details of the connection, customer/s mains, metering arrangements and/or requirements.
 - Meter number of at least one existing meter unless this is an initial connection.
 - Supply requirements (e.g. metering, No of Phases, etc.) and network availability.
 - Point of Supply. Mark whether supply is from underground pillar or overhead pole and provide number displayed on pillar or pole.
 - Details of the Electrical Contractor responsible for the work.
 - Details of the Electrical Mechanic who tested the work. **Note – If outgoing circuits are connected they must have been tested.**
- If an appointment is required, Ergon Energy will contact you to confirm a date and time – e.g. for a point of attachment change requiring electrical contractor to be on site.
- Unmetered connection of load will only be permitted where the load type (e.g. Tramline crossing lights) meets the relevant legislation and rules. These loads must be miniscule in nature and have a predictable load pattern. Details are available from Ergon Energy.
- For lighting tariffs "x" Tariff 91 for watchman lights and Tariff 71 for streetlights.
- In most situations work will only commence when Ergon Energy has received a Service Order Request (SOR) from the Retailer.
- Service connection support brackets and steel service poles must have a minimum rating of 1kN for 25mm services or 3.5 kN for 50 and 95 mm services. Timber service poles must have a minimum rating of 5 kN. (Refer to Queensland Electricity Connection and Metering Manual).
- If sufficient information is not provided, the Form will be returned unactioned.
- Illegible and mutilated forms will not be accepted.
- Customer's retailer must be made aware of any alterations or additions.
- The Certification statement must be completed (Signed) by the Qualified Technical Person making the certification - Applies to hard copy only. (Qualified Technical Person/s are those endorsed on the Contractors Licence)

How to Lodge a Completed Form

This form should be completed and lodged:

- Electronically via the Ergon Energy website <http://www.ergon.com.au>.
- Emailed to FormA@ergon.com.au
- Mail to PO Box 308 Rockhampton Qld 4700
