

Special connection request

For enquiries please phone (02) 6293 5749 or return this form by email to networkservicing@actewagl.com.au All systems must be approved by ActewAGL and all relevant authorities prior to connection to the ActewAGL network.

Customer/proponent de	etails						
Customer or business nam	ne						
Unit number	Floor	Street number	Street	name			
Block	Section	Suburb		State	Postcode		
National meter identifier (NMI) Check this box if you	Contact phone	ial connection request		ously submitted.			
Work site address							
As per customer/proponer	nt details listed above						
Location descriptor or bus	iness name						
Unit number	Floor	Street number	Street	name			
Block	Section	Suburb		State	Postcode		
Generator details							
Manufacturer			Mode		Series		
Number of generator units (or inverters)				Standard net metered PV Solar inverter system +			
Total installation nominal	rating ^	k\	W				
Inverter details (where	applicable)						
DC power supplied to each inverter Over freque			ency setting		Over voltage setting		
Phases Under freque			uency setting [Under voltage setting		
Solar panel details (whe	ere applicable)			Maria An			
Total number of panels Rating per pane			oanel	W	/atts Panels per inverter		
Panel manufacturer Panel model			ı				
If different inverters have o	different numbers of	panels, please provide d	letails as an at	tachment.			
Contractor/installer info	ormation						
Contractor/installer			Phone				
Business name			Email				
Electrical licence number			Clean	Clean Energy Council (CEC) accreditation number*			

[^] For Solar PV, enter the sum of the panel ratings. For all other generator units enter the sum of the generator units' ratings

⁺ For all other embedded generator special connection requests, please complete the additional generator details section overleaf

^{*}Applicable for inverter-based installations.

System information (req	uired for connections which	are not standard s	olar PV net metered system	s)	
Generator type	Generator energy source		Generator mode of ope	ration (tick all appropriate boxes)	
□ Inverter	☐ Solar ☐ Wind	☐ Diesel	☐ Gross metered	□ Demand responsive	
☐ Rotating machine	☐ Hydro ☐ Wave	☐ Fuel cell	□ Net metered	☐ Continuous operation	
☐ Other (please specify)	☐ Gas ☐ Battery		☐ Backup supply	☐ Peaking plant	
	☐ Other (please specify)		☐ Other (please specify)		
	l				
Generator details (requi	red for generator units not c	on the CEC list of ap	proved products)		
Nominal AC power		kW	Nominal AC current		А
