Application for Network Connection of a Micro Embedded Generating Unit <= 30kVA

Privacy Notice

Ergon Energy is collecting information on this Application for Network Connection of a Micro Embedded Generating Unit <= 30 kVA for the purpose of assessing your Connection Application. This may include the collection of your personal information. Your personal information will not be disclosed to any external third parties without your consent, unless authorised or required by law. If you wish to apply for access to this information or make a privacy complaint, you may contact the Right to Information & Privacy Officer on (07) 3851 6000, or visit ergon.com.au to obtain access application and privacy complaint forms. If you have provided personal information of another individual, please ensure that you advise the person about this privacy statement. Our privacy policy is available at ergon.com.au.

Application for Network Connection of a Micro Embedded Generating Unit <= 30kVA

Work Request Number:

Once completed, please	Email	Fax	Postal	General Enquiries
submit this form to Ergon Energy	energysystems@ergon.com.au	1300 554 029	PO BOX. 308, Rockhampton Qld 4700	1300 553 924

DO YOU HAVE THE RIGHT APPLICATION?

This Application is for:

- ✓ the connection of a new Micro Embedded Generating (micro EG) Unit
- a proposed alteration of or to an existing Micro Embedded Generating (micro EG) Unit (for example, increase in total array size or inverter capacity)

This Application does not apply for:

- a new supply connection to the Ergon Energy Network. For these connections you will need to complete the Network Connection Application Form.
- * a subdivision. For these connections you will need to complete the Network Connection Subdivision/Street Lighting Application Form.
- street lighting or public lighting. For these connections you will need to complete the Network Connection Subdivision/Street Lighting Application Form.
- the removal of an unmetered supply device. For these connections you will need to complete a Request for the Abolishment of Supply and Removal of Ergon Energy Electrical Assets Form.
- an unmetered supply device to be mounted on an Ergon Energy pole such as a CCTV. For these connections you will need to complete a Network Connection of Watchman Lights and Pole Mounted Unmetered Supply Devices Application Form .
- an unmetered supply device that is not mounted an Ergon Energy pole. For these connections you will need to complete an Application for Network Unmetered Supply Form.
- a load that exceeds 1500kVA/1.5MVA or where power usage is typically above 4GWh per annum at a single site or generation over 30kVA. For these connections go to <a href="https://www.ergon.com.au/network/connections/major-business-connections/major-connections/majo

Application for Network Connection of a Micro Embedded Generating Unit <= 30kVA

ERGON. ENERGY NETWORK

Work Request Number:_____

Type: Solar Wind	Hydro	☐ Battery/Solar	☐ Battery/Wind	Battery Only	
Total PV array/generator rated output (kW):		Total inverter rated AC po	ower (kVA):		
Upgrading unit?: No Yes, inverter only Yes, array/turbines only Yes, array/turbines and inverter					
If upgrading: Additional array/generator rated out	put (kW):	Additional i	nverter rated AC power (kVA):	
Is this a replacement inverter?:					
Inverter brand:	Inverter series:		Inverter Model:		
If micro-inverters, how many micro-inverters will b	e installed?:				
Number of phases of applicant's connection:		Single	Two	☐ Three	
Number of phases the proposed unit will be connected	cted to:	Single	Two	☐ Three	
Is premises on Single Wire Earth Return (SWER) net	work?:	☐ No	Yes		
Will inverter be export limited?:	Yes				
If Yes, how will this be achieved?:	er programming Sui	table relay Progra	mmable logic controller		
Will reactive power control be set?:	Yes				
If 'yes', tick setting 0.8 0.85 C A reactive power setting of 0.9 lagging is mandator	0.9 0.95 - all lagging		2kVA and connected to t	the Main network. i.e. not	
required on SWER Isolated networks.	y jor an experime men				
Nominated metering scheme:	ed (net) (<i>Queensland Solar Bond</i>	us Scheme requires net meterin	g) Dedicated (gros	ss)	
Other aspects of applicant's electricity service of po	tential relevance to technic	al assessment, e.g. length ar	nd size of consumer and servi	ice mains, approximate distance	
to nearest transformer, etc.:
